Product Manager & Design

Work Experience

Product Manager & Design

OCT 2025 - PRESENT

INADIGITAL HEALTH (IDH) KEMEKES INDONESIA | JKT

- **Led product requirements, strategic decision product and end-to-end delivery for ASIK (SATUSEHAT Indonesiaku),** enabling Puskesmas to track preventive healthcare screening across patient life cycles. Ensured personal data protection compliance and supported national health mapping and regulatory decision-making.
- Managed CKG and routine screening programs spanning NCDs, substance abuse, mental, adolescent, geriatric and environmental health, and smoking cessation. Developed Ayo CKG for self-registration and initial screening, plus program evaluation and reporting dashboards.
- **Aligned Ministry of Health leadership,** working units, District Health Offices, vendors and primary healthcare providers with cross-functional engineering, security, QA, product, design, research, content, marketing and support teams.
- **Oversaw** requirements, sprint planning, alignment, report update, product versions, error management and research evaluation, using NPS, CSAT and UTAUT to guide feature improvements.

UX Designer Lead

OCT 2022 - SEPT 2025

PT TELKOM INDONESIA TBK | JKT

- **Leading solution designer for complex digital products, driven by research, and orchestrating all stakeholders.** Product development includes developing user experiences for ***the latest products in the areas of Telkom's Strategic CX Platform, Government Procurement (LKPP), E-Health (SIMRS Kesehatan Satu Sehat), SIMKLINIK, EMR & vaccinations from the Telkom health ecosystem solution design team & blockchain.***
- This journey is built on a passion for product design centered on good user experiences.
- In my role, I collaborate with product teams, technology teams, other stakeholders, and customers to gather, understand, and define requirements, and ultimately design exceptional user experiences.
- Coordinate and alighment with other teams to ensure that research will impact users, business objectives, and the organization.
- Oversee the maintenance and implementation of visual design standards & Identify and resolve UX issues.
- Incorporate customer feedback, measure CX & UX usage metrics for their impact on business objectives, and incorporate usability findings into designs to improve the user experience.
